

Series | Flat vacuum cups SF

Flat vacuum cups Variopack® – SL-FP

Flat vacuum cups Variopack® – SL-FP

Optimized for FlowPack packaging

EXTREME FLEXIBLE SUCTION LIP

Product notes

Flat vacuum cups with extreme flexible single sealing lip for handling a wide variety of FlowPack packages. Only materials are used who are suitable for the food industry.

Advantage

- > Adapts optimally to a wide variety of surfaces
- > Very high cross force absorption due to internal support structure
- > Quick vacuum cup change by means of plug nipples
- > Increases pick rates and reduces machine downtimes

Ordering notes

* For vacuum cups with certificate of conformity for food contact, please select item number ending in "-LE".

Notes:

Vacuum cups made of material with a hardness of 35° Shore A are particularly suitable for thin packaging. The soft, very flexible silicone seals a more extreme drapery than vacuum cups made of 55°. However, the harder version made of SI 55° Shore A can take larger loads.
